Subject: Scheduled Power Outages

The campus will be testing the new Central Heating Plant (CHP) during the day on Saturday June 21. As a result of the testing, the campus will experience intermittent power outages on Saturday, June 21, beginning at 6 a.m. and lasting intermittently throughout the day until approximately 9 p.m. These outages will cause power disruptions across campus, with each lasting from a few seconds up to an hour. The power outages are necessary to connect the new CHP to the campus electrical distribution system, and to test those connections for safety and reliability.

We are sending this notice in advance to provide an opportunity for the campus community to raise any questions and concerns. Please call John Mathews, Assistant Director of Facilities and Campus Planning, at 545-6442, or email [jmathews@admin.umass.edu](mailto:jmathews@admin.umass.edu).

In scheduling these outages, we understand the importance of everyone's work and study. We hope that you and your departments will prepare for these tests to protect your vital systems. We recommend that computer servers be shut down and computers turned off for the duration of the outages on Saturday. We are working with science and research facilities to manage their critical experiments, incubators, and freezers. Look for more information at: [www.umass.edu/fp](http://www.umass.edu/fp)

Thank-you for your cooperation in this regard.

---

John Mathews, P.E., MPA  
Assistant Director of Campus Projects  
Facilities and Campus Planning Division
